**Date:** Wednesday, February 18, 2015 8:28:23 PM

---

**Eric:**

**Daniel indicated that the viper system is not working properly so there is either a problem with the system or too much metal on the site. He indicated that he talked with you about it and you said to keep tinkering with it but I have him doing too much for it not to work consistently. Any suggestions?**

**Thanks**

**Gary Moore**
